Subject: Schedule

Greetings – I'd like to propose a meeting among the recipients to discuss the conclusions and recommendations from the recent Supplemental Investigation Report regarding the Siltronic site. In that report, we indicated that evaluation of source control for TCE and its degradation products has been initiated. Potential source control measures could address both upland and in-river impacts as described in the report.

The general intent of the meeting is to discuss the process for implementing potential source control measures, and to identify project roles going forward. I will circulate a more detailed agenda prior to the meeting.

In my conversation with Chip earlier this week, he indicated that schedules would not likely open up until the first week of November. We have identified November 4th as a day that works for us, with additional openings the following week (excluding the 8th). Please let me know about your availability for this meeting.
